Education

Babu Banarasi Das University Lucknow

Bachelor of Technology in Computer Science (CGPA of 7.89)

August 2023 – June 2027

Lucknow, India

Projects

Fixify – Hyperlocal Service Marketplace | *React, Node.js, Express.js, MongoDB, REST APIs* | 🐙

- Engineered scalable distributed marketplace connecting 100+ concurrent users; reduced search time by 35% via location-based filtering and optimized REST APIs; applied **complexity analysis & data structures** for query performance.
- Architected modular backend following **clean architecture & SOLID principles** (core OOP design patterns); delivered responsive React UI boosting engagement by 40% — OOP proficiency transferable to **C/C++ embedded development**.
- Implemented **automated testing** achieving 75% code coverage; integrated real-time production monitoring and SOS emergency feature for low-latency, reliable response.
- Collaborated in **Agile/Scrum** sprint cycles; applied **distributed systems** design and **OS-level concepts** (concurrency, IPC) to reduce server load at enterprise scale.

HireBoost – AI-Powered Resume Optimizer | *React, Node.js, Gemini API, NLP* | 🐙

- Built AI-powered resume optimizer using NLP and Google Gemini API; improved job matching accuracy by 45% via keyword extraction and ATS scoring — demonstrates **abstract thinking** for complex, ambiguous problems.
- Developed robust backend with error handling and input validation; implemented **unit tests with Jest** achieving **80% code coverage** on critical paths — production-grade quality aligned with firmware testing standards.
- Automated bullet-point generation engine with real-time React UI feedback; self-directed full project lifecycle from architecture to cloud deployment; applied **analytical problem-solving** for undefined NLP edge cases.

Certifications

- MongoDB Developer's Toolkit (2024)** – CRUD Mastery with Node.js, Java, Python, C#; distributed database operations.
- J.P. Morgan Software Engineering Simulation (2024, Forage)** – Agile workflows, code reviews, and professional SDLC practices.
- Walmart Advanced Software Engineering (2024, Forage)** – Automated testing strategies, production monitoring, and deployment.
- Tata Group – Data Visualisation (2023)** – Business intelligence and data-driven decision making.
- Udemy – C++ Programming: Beginner to Advanced (2023)** – OOP, memory management, pointer arithmetic, and algorithm optimization — directly applicable to Qualcomm's C/C++ embedded development.

Technical Skills

Languages: C, C++, JavaScript, TypeScript, Python, Java

Technologies: React.js, Node.js, Express.js, REST APIs, TanStack Query

Databases: MongoDB, MySQL

Tools & Practices: Git, GitHub, Cloud Services, Clean Architecture,

Relevant Subjects: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Distributed Systems, Complexity Analysis
