Education

Babu Banarasi Das University, Lucknow

Bachelor of Technology in Computer Science (CGPA of 7.89)

August 2023 – June 2027

Lucknow, India

Projects

Fixify – Hyperlocal Service Marketplace | *React, Node.js, Express.js, MongoDB, REST APIs* | 

- Engineered scalable marketplace connecting 100+ concurrent users; reduced search time by 35% via location-based filtering and optimized REST APIs using **complexity analysis & data structures**.
- Architected modular backend with **clean architecture & SOLID principles**; delivered responsive React UI boosting engagement by 40%; applied **OS-level concepts** (concurrency, IPC) to reduce server load.
- Implemented **automated testing** (75% coverage), real-time monitoring, and SOS emergency feature; collaborated in **Agile/Scrum** sprint cycles.

HireBoost – AI-Powered Resume Optimizer | *React, Node.js, Gemini API, NLP* | 

- Built AI resume optimizer using NLP and Google Gemini API; improved job matching accuracy by 45% via keyword extraction and ATS scoring.
- Developed robust backend with error handling; implemented **unit tests with Jest** achieving **80% code coverage**; self-directed full project lifecycle from architecture to cloud deployment.

Briefly – AI News Aggregator | *Next.js, Gemini AI, Tailwind CSS, NewsAPI* | 

- Built AI-powered news aggregator delivering real-time headlines with intelligent summaries via Gemini AI; implemented multi-source content aggregation with fallback mechanisms ensuring 99% uptime.
- Engineered real-time search pipeline reducing content consumption time by 60%; designed responsive mobile-first UI with Tailwind CSS demonstrating end-to-end **product ownership**.

Certifications

- Full Stack Web Development – MERN Stack (2026, PrepInsta)** – End-to-end MERN stack development covering React, Node.js, Express.js, and MongoDB with production-grade practices.
- MongoDB Developer’s Toolkit (GeeksforGeeks)** – CRUD mastery with Node.js; aggregation pipelines, indexing, and distributed database operations.
- AWS (2026, PrepInsta)** – Cloud infrastructure, deployment pipelines, and AWS core services for scalable web applications.
- J.P. Morgan Software Engineering Simulation (2024, Forage)** – Agile workflows, code reviews, and professional SDLC practices.
- Walmart Advanced Software Engineering (2024, Forage)** – Automated testing strategies, production monitoring, and deployment.

Technical Skills

Languages: C, Java, JavaScript, TypeScript, Python

Technologies: React.js, Next.js, Node.js, Express.js, REST APIs, TanStack Query

Databases: MongoDB, MySQL

Tools & Practices: Git, GitHub, AWS, Cloud Services, Clean Architecture

Relevant Subjects: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Distributed Systems
