PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science student with expertise in full-stack development, distributed systems, and Agile methodologies. Proven ability to design and optimize scalable cloud-native applications with high-quality, testable code. Passionate about leveraging AI and abstract thinking to solve complex, ambiguous problems and contribute to enterprise-scale cloud services in fast-paced, collaborative environments.

EDUCATION

B.Tech in Computer Science BBD University, Lucknow, India Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Software Engineering	2023 – Present CGPA: 7.89 / 10.0
Intermediate – Class XII Board of High School & Intermediate Education, Uttar Pradesh	2022 73.4%
High School – Class X Board of High School & Intermediate Education, Uttar Pradesh	2020 69%

TECHNICAL SKILLS

Languages	C++, Python, SQL, JavaScript, Java
Frontend	React.js, HTML5, CSS3, TanStack Query, React Router DOM
Backend	Node.js, Express.js, REST APIs, API Optimization
Databases	MongoDB, SQL, DBMS Design, Distributed Data
Testing	Jest, Unit Testing, Automated Testing, Postman
Tools	Git, GitHub, Agile/Scrum, Cloud Services, Clean Architecture, SOLID Principles
Core CS	Data Structures, Algorithms, OOP, Distributed Systems, Complexity Analysis

PROJECTS

Fixify – Hyperlocal Service Marketplace	React, Node.js, Express.js, MongoDB, REST APIs
- Engineered scalable distributed service marketplace connecting 100+ concurrent users with nearby providers; reduced service search time by 35% via location-based filtering and optimized REST APIs - Architected modular backend with Express.js following clean architecture & SOLID principles; delivered responsive React UI boosting engagement by 40% - Implemented automated testing for critical API endpoints achieving 75% code coverage; integrated production monitoring for real-time service health and introduced SOS emergency feature - Collaborated in Agile/Scrum sprint cycles with daily standups and code reviews for iterative feature delivery - Designed cloud-native service architecture supporting enterprise-scale operations; applied complexity analysis to optimize query performance and reduce server load	
HireBoost – AI-Powered Resume Optimizer	React, Node.js, Gemini API, NLP
- Built AI-powered resume optimizer leveraging NLP and Google Gemini API to align resumes with job descriptions; improved job matching accuracy by 45% via keyword extraction and ATS scoring - Developed robust backend with error handling and input validation; implemented unit tests with Jest achieving 80% code coverage on critical processing paths - Automated bullet-point generation engine and integrated real-time frontend feedback with responsive React UI - Demonstrated abstract thinking to navigate ambiguous NLP requirements; self-started full project lifecycle from architecture to deployment on cloud services	

CERTIFICATIONS & ACHIEVEMENTS

- MongoDB Developer's Toolkit** (2024) – CRUD Mastery with Node.js, Java, Python, C#; distributed database operations
- J.P. Morgan Software Engineering Simulation** (2024, Forage) – Agile workflows, code reviews, professional SDLC practices
- Walmart Advanced Software Engineering** (2024, Forage) – Automated testing strategies, production monitoring, deployment
- Tata Group – Data Visualisation** (2023) – Business intelligence and data-driven decision making
- Udemy – C++ Programming: Beginner to Advanced** (2023) – OOP, memory management, algorithm optimization
